

We spent over a year developing our architectural plans for our custom dream home in Austin's Rosedale neighborhood. We then tediously interviewed and obtained five detailed bids from builders that all came highly recommended to us from various trusted sources. Ultimately, we selected Jeremy Martin and his team to build our home, and we couldn't be more pleased with the results! Jeremy and his team provided practical and cost-saving input on our architectural drawings, were responsive to all our questions and concerns throughout the building process, and have continued to promptly and professionally address issues that have arisen after the completion of our home – all while staying within our budget and creating the most beautiful home on our block (if we say so ourselves)!

We highly recommend Jeremy and his team to anyone wanting to build or renovate their home.

It is time to thank you and your subs for your organizational skills and attention to details. Your quick and appropriate response to each concern we had was appreciated. We feel your craftsmen built a good solid home for us and we enjoy the compliments from friends and neighbors. We think of you guys as family.

"We were extremely pleased with the quality and expertise that RisherMartin delivered on our back porch remodel. In addition to providing excellent design advice, Chris handled the project from beginning to end. We were extremely satisfied and will definitely use RisherMartin again. Highly recommended!"

My husband and I could not be happier with our new kitchen. I don't know how we could have done it all without your help. Your eye for detail and your constant efforts to move the job along meant we were without our kitchen for much less time than I thought possible. I am so glad I listened to you about how we should open the wall between the old kitchen and the new breakfast room. Don't let your painter get away. I am still amazed every time I look at the new cabinetry and how well he was able to match it to the existing cabinets. The new island is just what I hoped for. You were right about leaving the walnut top natural.

"On time and on budget – who would have thought? I'll admit that I was nervous kicking off my renovation project in Travis Heights – who hasn't heard the horror stories? But you guys made it look easy – from the initial consultation, to the selections, to the finished product. I could not be happier with my new kitchen, my new windows (they actually open and close!), and my new utility room. What a difference. I hope my next project will be a fully custom home, and there is no doubt who I'll call to build it. Thanks Again!"

Travis Heights

I was very nervous about remodeling my kitchen and updating some of the other rooms in my home, but RisherMartin made the process easy and worry-free. Their subcontractors treated my home with respect - they were friendly, professional and exceptionally clean. I was extremely pleased with the finished product, and I felt the pricing was very fair given the high level of customer service I was shown from start to finish. I'm considering some work on my bathrooms in the future and I'll only make one phone call – to RisherMartin. They are organized and a joy to work with.

We are incredibly pleased with the work Risher Martin did for us. We had what we thought was a small amount of rot, that turned out to be a giant project to replace. They were thorough in their initial inspection, fair on the price, and incredibly quick completing the work. I love their "whole house" approach, in that they found other things that needed to be fixed as well. (Things that had been neglected by other contractors.) They are experienced and very professional. Would highly recommend.

So many people wondered if I was crazy for remodeling my mother-in-law's kitchen. Maybe yes, but I hired RisherMartin and they were amazing. They took the time to understand exactly what I was looking for, arranged the appointments to choose finishes around my schedule, and followed through on every single item that they said they would do. My husband was impressed because at each stage of the job, the house was always left clean - even after demo! I highly recommend working with RisherMartin. Best customer service, very quality work, and competitive pricing.

Outstanding Builder - My wife and I are tremendously pleased with the work that Jeremy Martin did in building our new home. We give him our highest recommendation, and the reasons are simple. He works on a tight schedule; he stays in budget; and – most importantly – the quality of his team's work is absolutely first rate. Jeremy is a consummate professional, and he is amazingly pleasant to deal with. Jeremy's first and only priority was to get it right, and we have a beautiful home as a result. Five stars, no question.

Unbelievable customer service and lightning fast completion My husband and I just remodeled our garage into a mother-in-law suite. RisherMartin was highly professional, and had the job completed in a record amount of time. They provide the best customer service I have ever seen. We are thrilled with the finished product, and would highly recommend RisherMartin.

RisherMartin goes above and beyond time and time again. We approached them in May with an impossible project: Already with 2 young children living in a small central Austin bungalow, we were expecting surprise twins in a matter of months and needed to remodel and add on before the babies were to arrive. By early November, RisherMartin had elegantly handled a major demolition of our garage apartment, extensive (and unforeseen) foundation repair to the existing house, a complete renovation of our kitchen and play room and constructed an 1100 square foot addition. The twins were born one week later!

Beautiful craftsmanship and impeccable client communications define RisherMartin. Remarkable elements of our project include installing 100 year old reclaimed longleaf pine floors throughout the addition, complete lead paint removal on the exterior of the old house, rehabilitating a badly failing foundation on the old house while connecting a new foundation for the addition all on a sloping and difficult lot, custom tile in the bathrooms, custom poplar trim throughout the addition, installing historically-approved and environmentally-friendly marmoleum flooring in the kitchen, and effectively

executing the architect's design for maximizing natural light throughout the home.

Another aspect worth noting is RisherMartin's particular sensitivity to and appreciation for old homes. We love our old home, built in 1927, and throughout our relationship with RisherMartin, we trusted their knowledge and care for the older structure while integrating modern concepts such as energy-efficiency.

Everyone warns you about remodeling a house and claims that the process can be a nightmare -- We are so grateful to Chris and Jeremy for all of their hard work and steadfast commitment to excellence because they made what could have been a very challenging time for our family one fraught with excitement and possibility. We hope to stay put here and raise our kids in the house that they built for us. Obviously, we highly recommend them to others considering any kind of renovation project.

RisherMartin did an unbelievable job on our kitchen and bath remodel. My husband and I could not be happier. Jeremy and Chris are both incredible to work with, and their work speaks for itself. Our project was completed quickly, our home was kept as clean as possible throughout the project, and no detail was neglected. Jeremy made sure every part of every task was completed to his high standard of excellence and avoided all unnecessary expenses. We truly enjoyed working with Jeremy and definitely plan to use RisherMartin again in the future and recommend them highly to our friends.
